Jason G. They were instructed to imagine being a medical doctor, and that one of their patients suffers frequently of stomach troubles after meals. In this case, animals may make use of environmental enrichment until the effect is no longer rewarding at which point the animal may become habituated to the stimulus 2.

Description Although many professionals in psychology including the sub-c McConnell, and Ralph R. Dishabituation may occur if the stimulus is too strong too much or too fast resulting in the return of the original response.

Stress and behavior in domestic animals: Temperament as a predisposing factor
Bridget L. Fear and eyeblink conditioning involve generally non overlapping neural circuitry, but share molecular mechanisms.
