Northern Copperhead

Copperhead snakes are some of the more commonly seen North American snakes. They're also the most likely to bite, although their venom is relatively mild, and their bites are rarely fatal for humans. These snakes get their name, fittingly, from their copper-red heads, according to.

Copperhead bites Haywood County woman | WLOS

Description: Copperheads are fairly large - 24 - 40 in (61 - cm), heavy-bodied snakes with large, triangular heads and elliptical pupils (cat eyes). The body.

Agkistrodon contortrix - Wikipedia

Agkistrodon contortrix is a species of venomous snake endemic to Eastern North America, a member of the subfamily Crotalinae (pit vipers). The common name for this species is the copperhead.
