I was given a tomato plant when school closed. If transplants started from seed indoors have become leggy, lay the plant on its side, dig a hole for the root mass and a trench for the leggy stem and bury the top portion of the plant up to the first leaves. They grow to be large and round and are kind of meaty for a tomato.

KarenCarterspentthreeyearsasatechnologyspecialistinthepublicschool Sometimes a bit of wind, even shaking, will help. If so, you may need to cool your plants.

Startpickingyourtomatoesasthefruitsripenandgainfullcolour.After the pot has wicked up the water, empty the water from the tray. Well-rotted horse manure is a perfect food and I would suggest adding as much as one wheelbarrow full per square yard of soil.
