I would love to hear an update. Previous studies have focused on inoperable LC, but we were interested in how patients communicated early symptoms so we conducted interviews with patients awaiting surgical resection of LC suspected or histologically confirmed. Thanks for your great website and thanks for the advice about not ignoring symptoms.

OnDecember22,mychesttubewasremovedandIstartedchemo,thedaybeforemy
The participant group included patients with an established or probable LC diagnosis. The results section presents key findings about symptom presentation, including reasons for non-presentation, and the implications of question type and terminology.
