While security risks typically affect organizations and result in financial losses, privacy risks affect individuals and result in ethical issues. By establishing and enforcing the laws on RFID-generated data, the legal approach is intended to deter the occurrence of security and privacy risks and to provide individuals with a means of recourse in the case of a privacy breach. This section, however, focuses on providing an overview of the risks that are specifically associated with RFID-enabled supply chain visibility: security risks and

privacy risks.

While industrial laundries still are our priority, there is growing interest in more solutions. If you wish to place a tax exempt order please contact us. Read. A received signal strength RFID-based indoor location .
